

Domus 4 (Edge Option)

Discover the Domus 4, the therapeutic mattress designed to treat stage 1 to 4 pressure wounds for medium to high-risk patients. It combines comfort, safety and ease of use.

Main Features

- Pressure adjustment according to patient weight (manual gradation)
- Available modes: alternating, static, maximum inflation, seat inflation
- Cell-on-cell design with heel relief for added safety
- Low air loss directly from cells
- Visual and audible alarms in case of low pressure or failure
- CPR function: rapid deflation in emergency situations
- Remains inflated up to 4 hours without power (transport mode)
- Technical cover: waterproof, breathable, antibacterial, fire-retardant
- Maximum capacity: 400 lbs (181 kg)

Description

CONTROL UNIT (COMPRESSOR)

- Alternating mode every other cell: Optimal pressure redistribution
- Static mode: When mattress is used in immersion
- Raised backrest mode (Seat Inflate): Secures sitting position in bed
- Maxfirm mode: Facilitates care and transfers
- Patient weight adjustment: Gradation on pump

MATTRESS

- Available sizes: 35" x 78" x 8" and 42" x 80" x 8" (only for Edge version)
- Weight capacity: 400 lbs (180 kg)
- Inflation autonomy: 4 to 6 hours in transport mode
- Cells: Cell-on-cell format

TOP COVER

- Quilted cover treated with silver for increased antibacterial activity
- No visible seams, latex-free

- Fire-retardant, water-repellent, antistatic, antibacterial/antimicrobial
- Protected zipper closure
- Optional detachable and stretchable polyurethane cover, impermeable to liquids and permeable to water vapour

FIRM SIDE BORDERS

- Available in foam in Edge version in dimensions 36" x 80" x 8" and 42" x 80" x 8"

Other Information
