

Discover the Domus Auto, the intelligent therapeutic mattress that automatically adjusts to the patient's weight and position.

Designed to prevent and treat pressure wounds, it combines comfort, safety and ease of use.

## Main Features

- Automatic pressure adjustment according to patient weight
- Available modes: alternating, static, maximum inflation, seat inflation
- Cell-on-cell design with heel relief for added safety
- Visual and audible alarms in case of low pressure or failure
- CPR function: rapid deflation in emergency situations
- Remains inflated up to 8 hours without power (transport mode)
- Technical cover: waterproof, breathable, antibacterial, fire-retardant
- Maximum capacity: 400 lbs (181 kg)

## Description

### CONTROL UNIT (COMPRESSOR)

- Alternating mode every other cell: Optimal pressure redistribution
- Static mode: When mattress is used in immersion
- Raised backrest mode (Seat Inflate): Secures sitting position in bed
- Maxfirm mode: Facilitates care and transfers
- Patient weight adjustment: Adjustment is automatic

### MATTRESS

- Available sizes: 35" x 78" x 8"
- Weight capacity: 400 lbs (180 kg)
- Inflation autonomy: 6 to 8 hours in transport mode
- Cells: Cell-on-cell format

### TOP COVER

- Quilted cover treated with silver for increased antibacterial activity
- No visible seams, latex-free

- Fire-retardant, water-repellent, antistatic, antibacterial/antimicrobial
- Protected zipper closure
- Optional detachable and stretchable polyurethane cover, impermeable to liquids and permeable to water vapour

### FIRM SIDE BORDERS

- Not available

## Other Information

### ACCESSORIES

- Transport bag included
- Option: Heel relief plugs
