

The K3MP surface is a therapeutic mattress designed to treat stage 1 to 4 wounds.

Since the pump is a turbine, it allows effective low air loss, avoiding maceration in case of heavy perspiration.

Main Features

- Pressure adjustment: gradation to patient weight
- Available modes: static, maximum inflation, seat inflation
- Cell design: Full
- Visual and audible alarms in case of low pressure or failure CPR function: rapid deflation in emergency situations
- The pump is a turbine, so it does not have any inflation autonomy.
- Technical cover: waterproof, breathable, antibacterial, fire-retardant
- Heel relief plugs
- Maximum capacity: 450 lbs (205 kg).
- Available sizes: 36" x 80" x 7".
- M = Under-mattress
- P = Foam borders
- Cells: full

Description

CONTROL UNIT (COMPRESSOR)

- Static and pulsation mode: When mattress is used in immersion
- Raised backrest mode (Seat Inflate): automatic adjustment
- Maxfirm mode: Facilitates care and transfers
- Patient weight adjustment: Manual adjustment (gradation to patient weight)

TOP COVER

- Quilted cover for increased comfort
- No visible seams, latex-free
- Fire-retardant, water-repellent, antistatic, antibacterial/antimicrobial
- Protected zipper closure

FIRM SIDE BORDERS

- Foam side borders
