

Nucare uses part of Mensa technology, already approved and established in the market. In this version, the silicone capsules are replaced with premium viscose foam, designed to provide optimal comfort.

Main Features

- High-density reinforced edges to facilitate transfer
- Air chamber for enhanced localized pressure reduction
- Air chambers reduce off-loading pressure by 40%. The rest is redistributed by the high-quality viscose foam.
- Polymer carved in cubes for local adaptation to variable shapes and different body segments
- Uniquely formulated elastomers
- Additional pressure reduction at feet
- Dimensions: 35" x 78" x 6" and 36" x 80" x 6"
- Also available in: 39"-42"-48"-54"-60" width
- Also available in stretcher format
- Maximum weight 400 lbs
- No contraindications
- Dartex cover
- Protected seams
