

Mensa

Pressure-injury prevention simplified

Approved under Mohawk Medbuy Innovation Program

The Problem

Rising PI prevalence across acute care units.

Reportable incidents in all provinces.

~ 26%

of patients at PI risk (LTC and acute)

Jia YJ et al., J Tissue Viability, 2024

~ \$50K+

per Stage 3-4 treatment episode

CHU de Québec

\$0

maintenance required

Non-powered
No pump

The Solution : Mensa

- **70% full-body pressure reduction:** silicone capsule immersion
- **Reactive redistribution:** responds to every move
- **Fast shipping and delivery** across Canada
- Purchase or rent (operational expenses)

Why it matters

For your patients	What Mensa does	The result
High PI risk LTC and acute	Reactive foam adapts continuously. No positioning required.	Fewer incidents Less liability
Busy clinical teams	Zero maintenance burden. No pump. No alarms, nothing to service.	Time saving for care teams

3 ways to access Mensa

Demo

Free facility visit. See Mensa at your unit.

Rent

Rent under your operating-expense budget.
