

REACTIVE SUPPORT SURFACE · AIR/FOAM HYBRID

P.R.O. Matt® Plus

A non-powered mattress featuring a P.R.O. Technology® valve for the prevention and treatment of pressure injuries

The Problem

Pressure injuries are common among hospitalized patients.

8.4%

of pressure injuries develop during a hospital stay

Li et al., Int J Nurs Stud, 2020

\$3,616

Monthly cost of a single uncomplicated Stage 3-4 pressure injury

Wounds Canada, 2019

<1 hour

A pressure injury can develop in less than an hour

Gefen, 2008

The Solution: P.R.O. Matt® Plus

Prevention and treatment: Stages 1-4, convertible between non-powered and alternating pressure modes

Simplicity for caregivers: P.R.O. Technology® valve with automatic adjustment

Comfort and safety: Viscoelastic overlay, firm perimeter, non-slip base

Adaptability: Up to 500 lb capacity, a choice of 2 control units, compatible with standard and bariatric bed frames

Warranty: 5 years on the mattress, 1 year on the cover

Why It Matters

A clinical solution. Operational advantages.

For Your Patients	The P.R.O. Matt Plus Response	The Result
Risk of pressure injuries, Stage 1-4	The 4-zone air core and P.R.O. Technology® valve continuously redistribute pressure without caregiver intervention.	• Fewer incidents • Better skin protection
Evolving clinical needs	Non-powered by default, convertible to alternating pressure as needed.	• One product (fewer inventory rotations) • No maintenance cost
